

The age of digital transformation

And the challenges facing CIOs

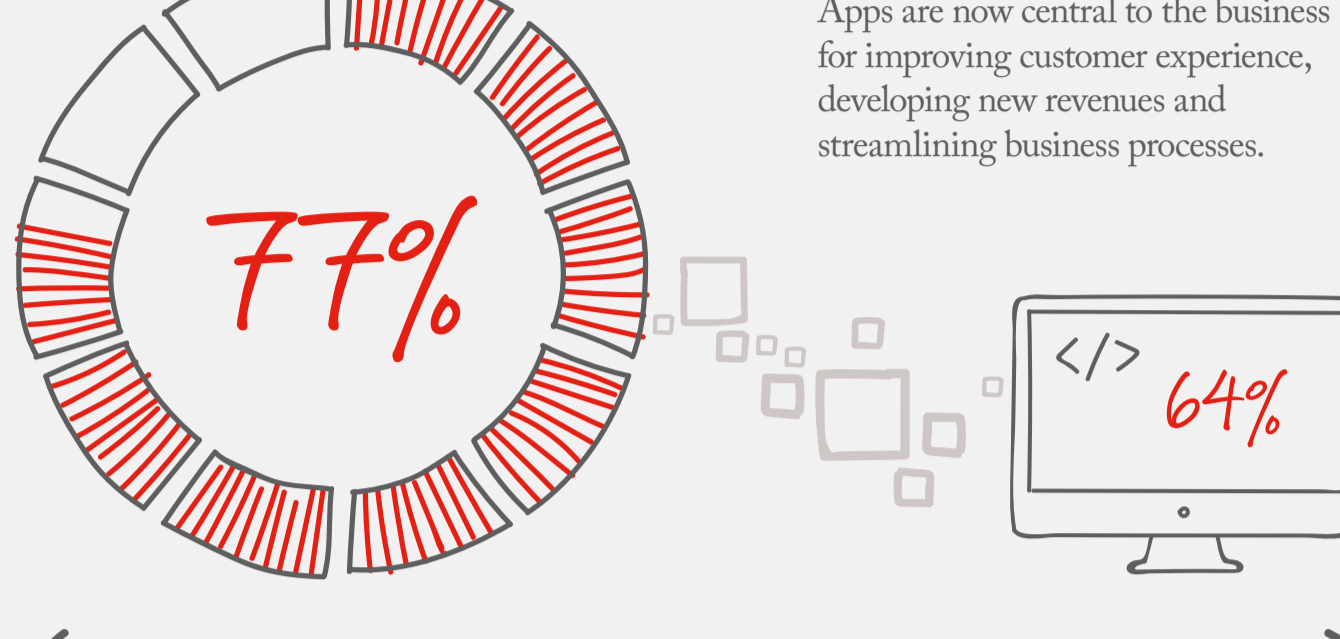

DIGITALLY ENABLED BUSINESSES

Decentralisation of IT

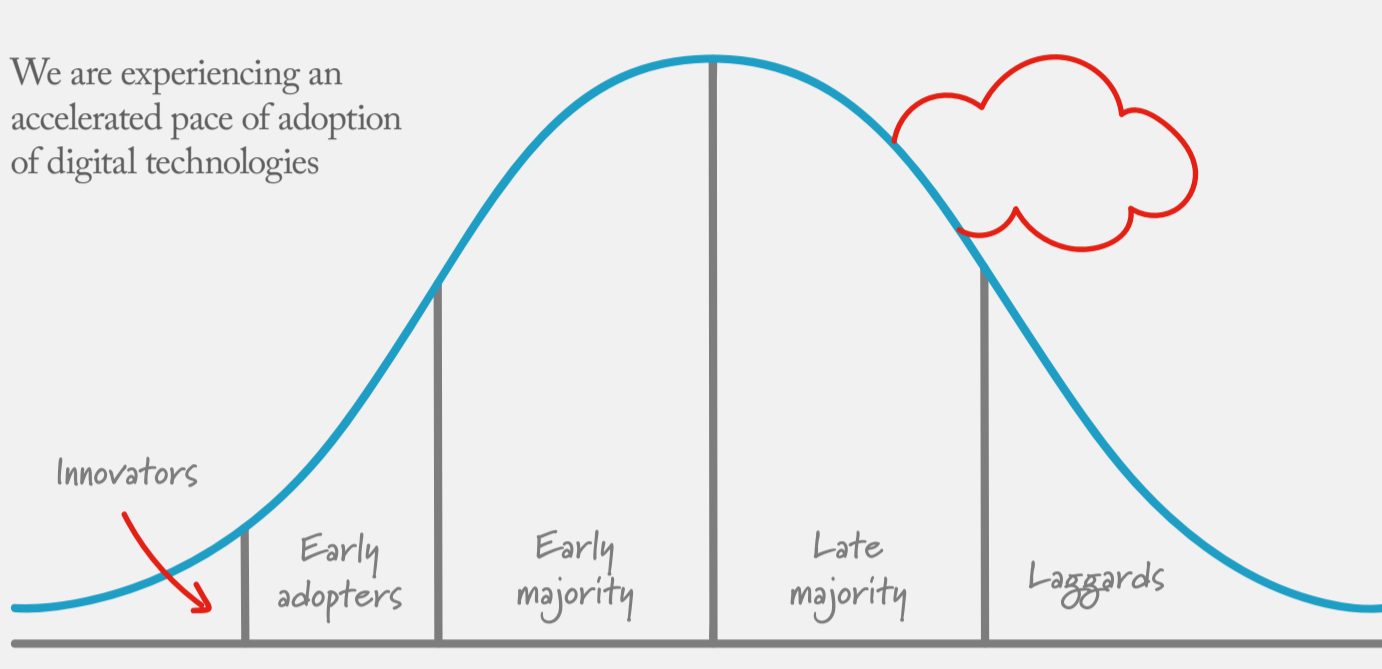

Apps are central to transformation

77% of firms are developing apps – with 64% of those firms having internal developers

The acceptance of a digital age for businesses

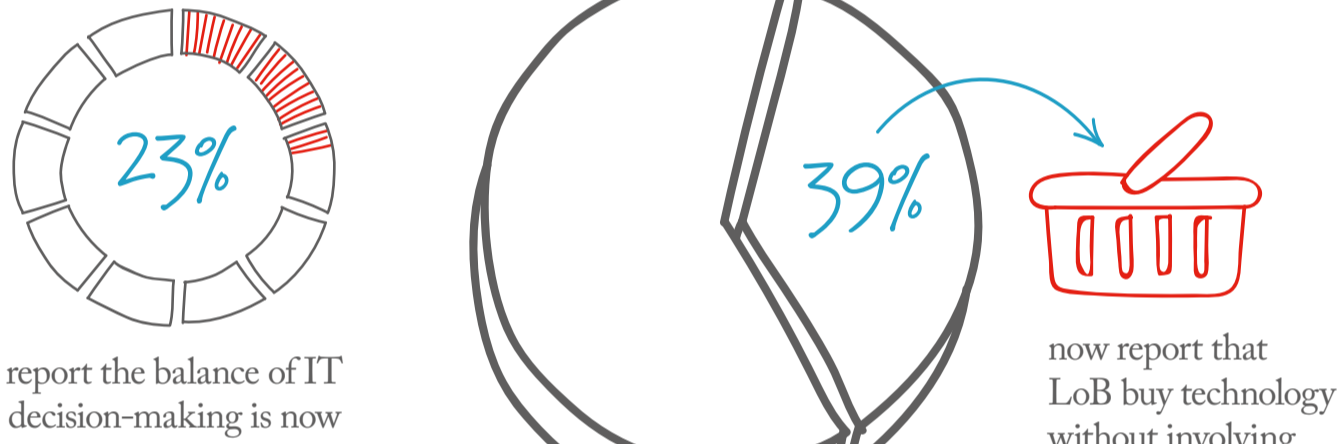

THE CHALLENGES FACING CIOs

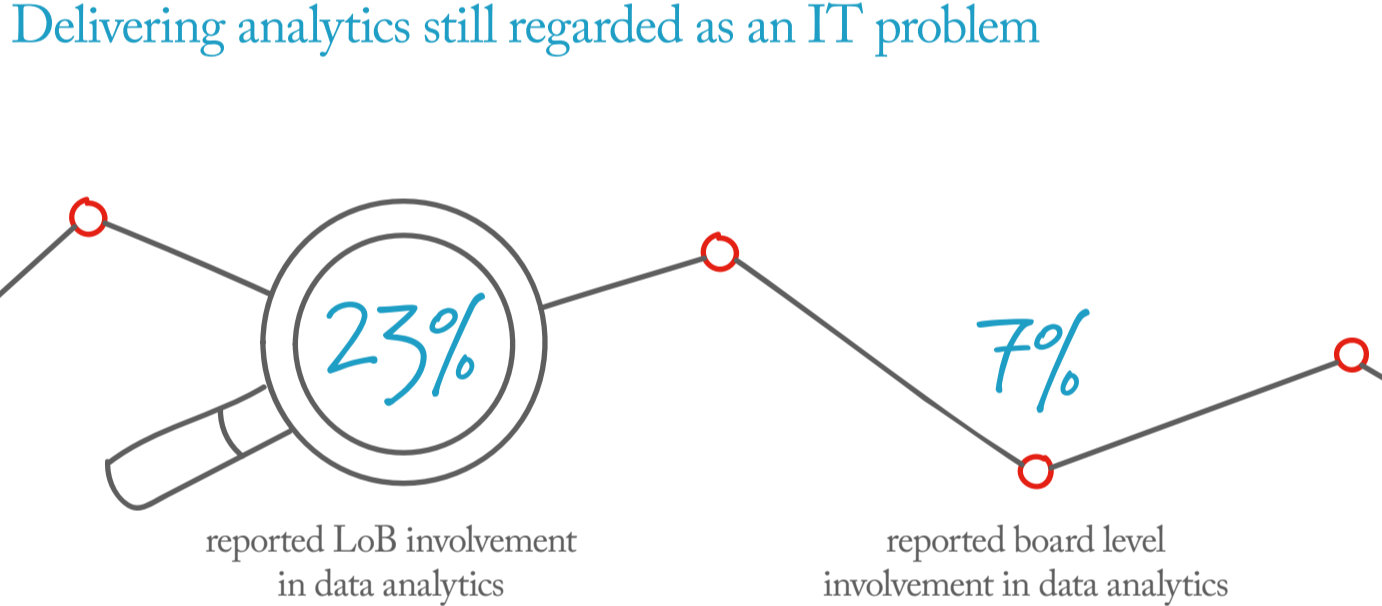

Slow shift towards strategic initiatives

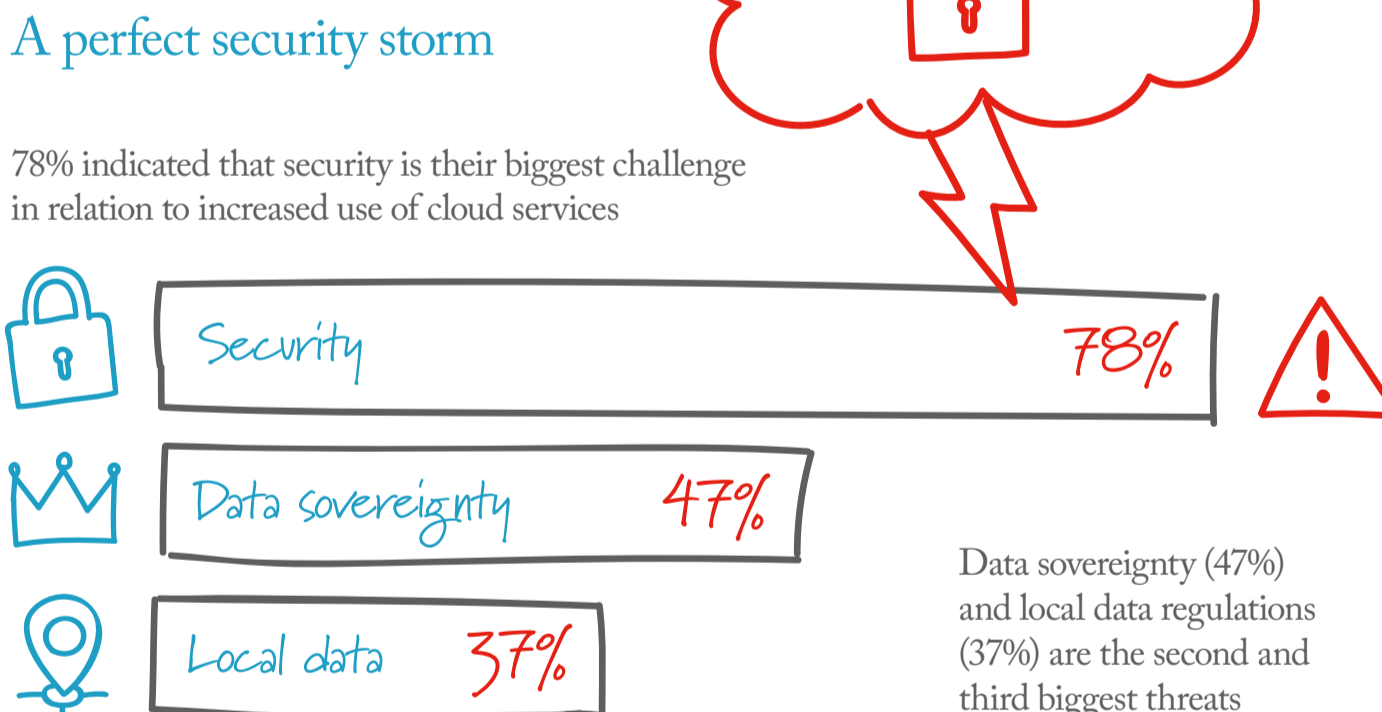

IT decision-making

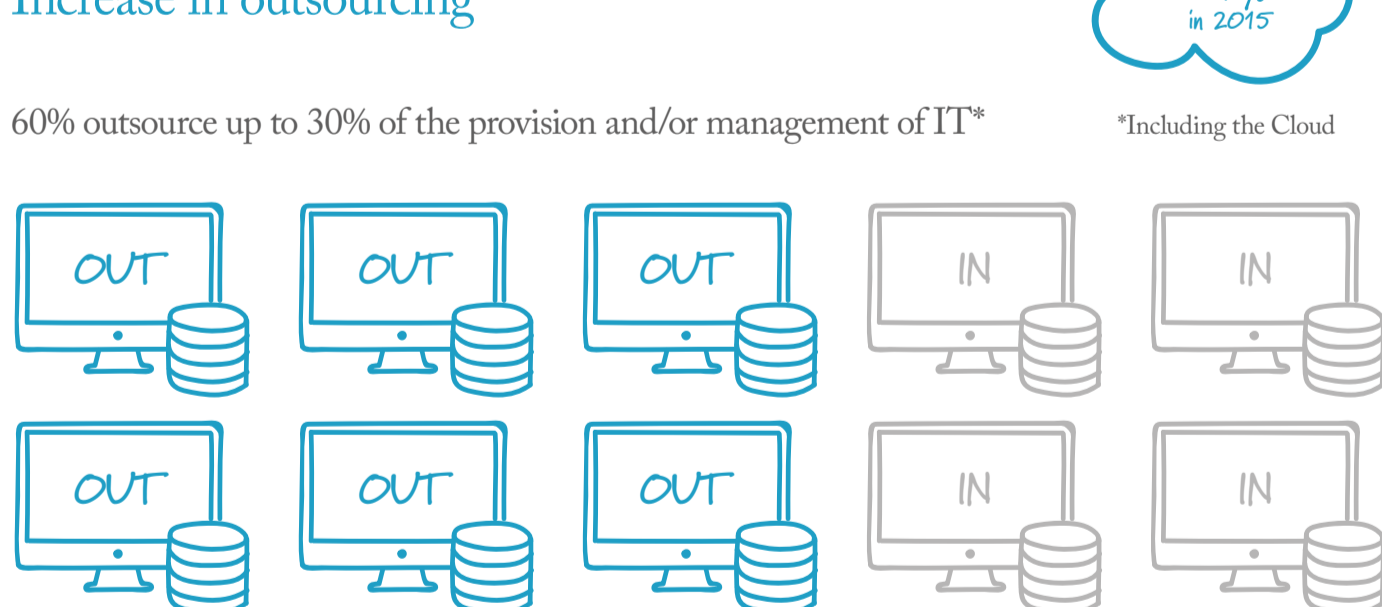

Delivering analytics still regarded as an IT problem

A perfect security storm

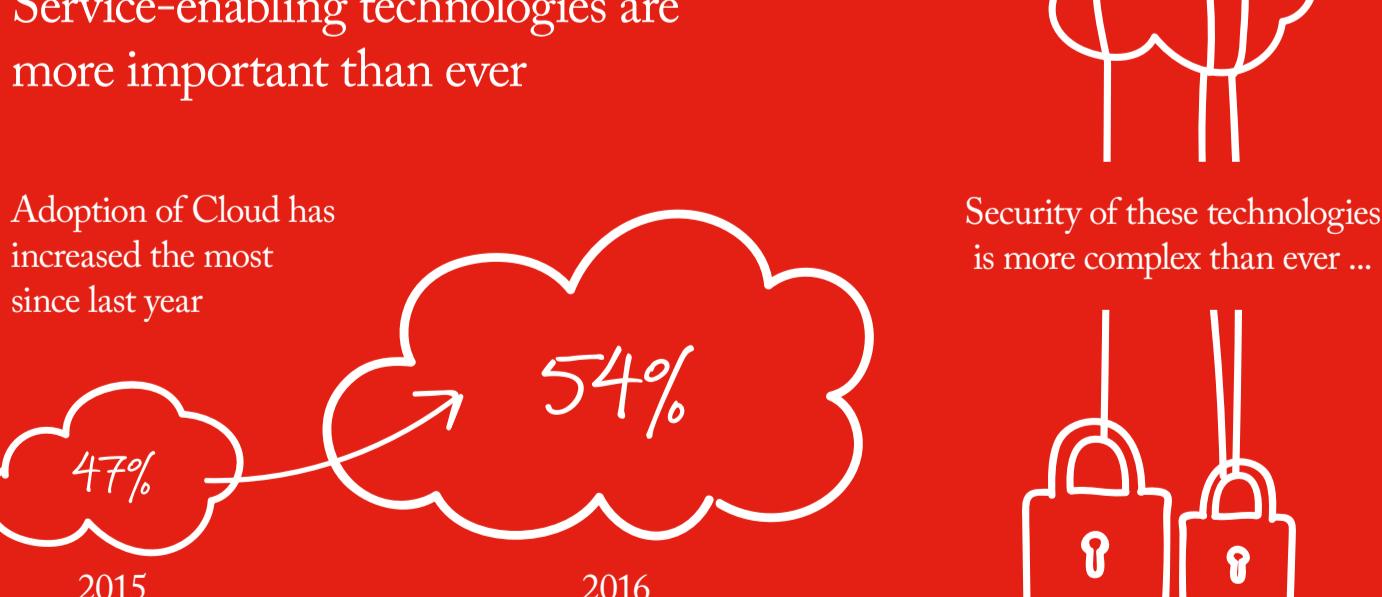

Increase in outsourcing

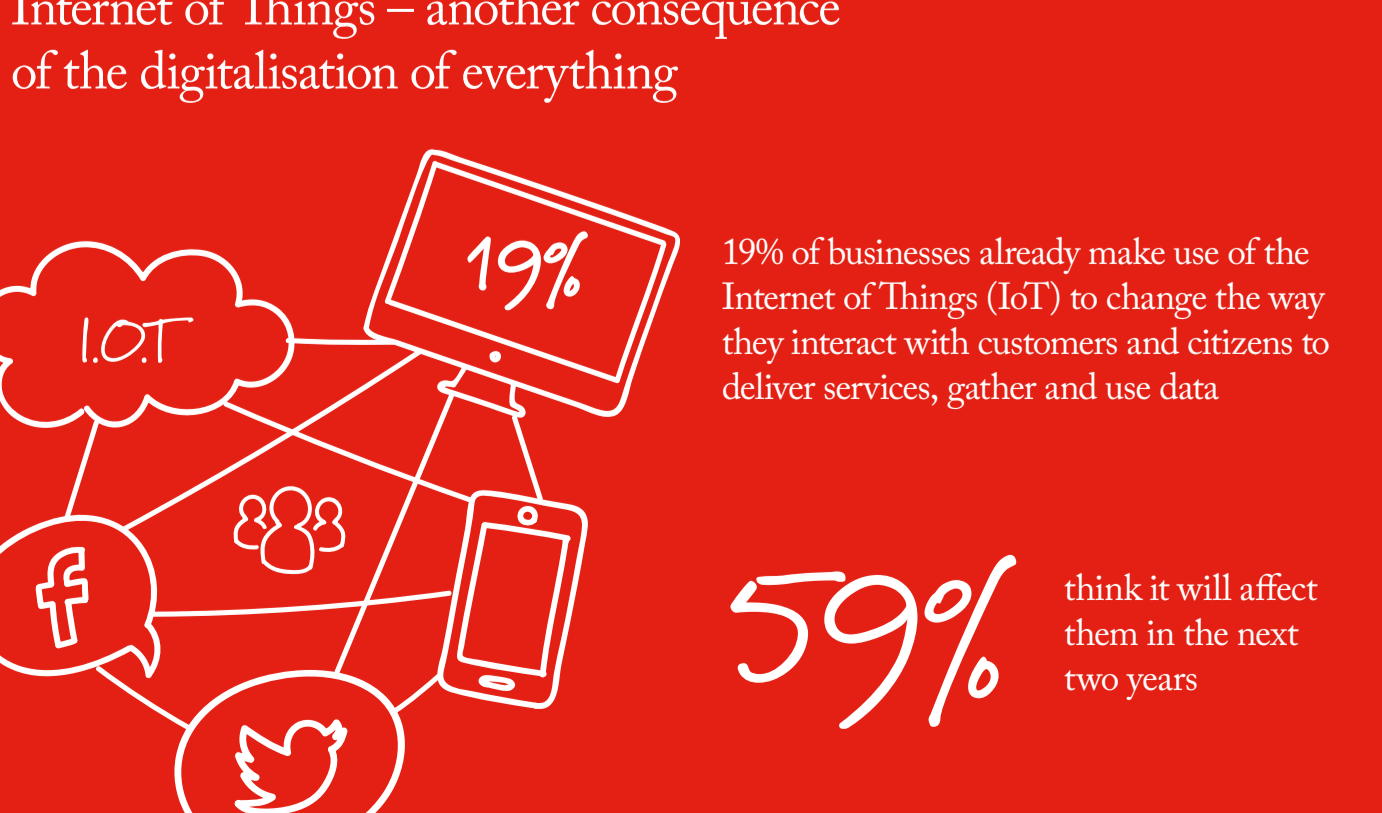

THE FUTURE OF DIGITAL

Service-enabling technologies are more important than ever

Internet of Things – another consequence of the digitalisation of everything
