Professional IT Services

To make technology an enabler and a source of competitive advantage for an organisation, a combination of specialist skills is required. The Professional IT Services that are available from Logicalis, including Technology Consultancy & Project Governance Services and Flexible Resourcing, give organisations access to specialist skills as and when they are needed.

Business Benefits of our Professional IT Services

✓ Get access to highly certified technologists with diverse experience in multiple industries.

✓ Partner with an organisation that has vast experience in implementing projects according to industry-recognised best practices, reducing your risk and ensuring a successful and timely implementation.

✓ Knowledge share: We provide documentation, knowledge transfer and training of your staff.

✓ Releases the IT team to focus on their core competencies.

✓ A faster-time–to-deploy allows a faster-time-to-market and a faster RoI.

Professional
Consultancy Services

Align technologies to your business goals with guidance from our specialist consultants.

Get the people that you need for the time you need them.

Projects delivered on schedule and to budget meeting the requirements of the business.

Flexible Resourcing

Project Support Services

Technology Consultancy & Project Governance

Our Consultancy & Project Governance Services will add value to your business by providing strategy, design and implementation support that will help you to plan, build, optimise and innovate your IT and business solutions.

We deliver a range of packaged and bespoke services, from assessments that ensure existing IT assets deliver maximum value, to the design, build and optimisation of more complex infrastructure.

Our team of highly skilled professionals will help you to evaluate all of your options and choose the combination that fits your specific needs and resources.

We provide a total service solution, which includes Project Management Services, taking control of delivery from start to finish. Our Design and Implementation Services combine the people, processes and technology, with the program and project management necessary to transform your existing infrastructure, and minimise risk and deployment times.

- ✓ Proof of Concepts (PoC)
- ✓ Security, Data Protection and Governance

"We like to work with technology partners to help us deliver value with our projects. Logicalis helped us move two data centres from the Isle of Man to Dublin, a project which was pretty much seamless for our customers and delivered with precision."

Brian Cullen, Head of Infrastructure, Paddy Power BetFair

Flexible Resourcing

Flexible Resourcing from Logicalis provides organisations with strategic resourcing solutions that will enable you to manage your IT headcount in a smarter and more innovative way.

A constant challenge for any organisation is ensuring that they have the skills that they need when they need them, while at the same time managing headcount constraints and costs; such as recruitment, training, salaries and pensions.

This is particularly the case when it comes to IT staff where the dynamic nature of many IT projects, such as a new infrastructure rollout, an infrastructure refresh or the implementation of a new software solution, can create peaks and troughs in resourcing demands.

Flexible Resourcing addresses these challenges. By outsourcing the entire recruitment lifecycle, you can focus on driving core business activities that will support the goals of the business. In return, you get and pay for the skills that you need only when you need them.

Our teams of highly skilled and accredited engineers are available for short-medium and long term engagements. These resources are part of the Logicalis team and have full access to the knowledge and experience of our in-house pool of technologists. Through our strategic partnerships, they have direct access with product experts from vendors such as IBM, NetApp, Cisco, HPE, Citrix, Oracle, ServiceNow and VMware.

Benefits of our Flexible Resourcing

✓ Fast and reliable resourcing of specialist staff

✓ Holiday, absentee and seasonal demand cover

✓ Timely completion of short or long-term projects

✓ Turn fixed costs into variable costs

✓ Remove costs associated with recruiting permanent resources

✓ Access to a wider talent pool

✓ Skills where and when you need them

> *"Working with an external partner to deliver IT projects makes sense on many levels. A specialist technology provider typically has access to multidisciplinary IT professionals who are skilled in a variety of technologies because of the work they carry out."*
>
> David O'Hagan, Consulting Services Business Manager, Logicalis

About Logicalis

Logicalis is an international multi-skilled solution provider providing digital enablement services to help customers harness digital technology and innovative services to deliver powerful business outcomes.

Our customers span industries and geographical regions; and our focus is to engage in the dynamics of our customers' vertical markets; including financial services, TMT (telecommunications, media and technology), education, healthcare, retail, government, manufacturing and professional services, and apply the skills of our 5,700 employees in modernising key digital pillars; data centre and cloud services, security and network infrastructure, workspace communications and collaboration, data and information strategies, and IT operation modernisation.

We are the advocates for our customers for some of the world's leading technology companies including Cisco, HPE, IBM, NetApp, Microsoft, Oracle, ServiceNow and VMware.
